CORVANE SOFTWARE

Account Executive Compensation Plan

Plan quarter: Q3 FY2026, July 1, 2026 through September 30, 2026

1. Pay Structure

On-target earnings (annual)	$160,000
Base salary (annual)	$80,000
Quarterly target incentive	$20,000
Quarterly quota	$300,000 of credited bookings

2. Crediting

2.1 Only opportunities in the Closed Won stage with a close date inside the plan quarter are credited.

2.2 Credit equals first-year contract value. The Amount field in the CRM is total contract value. For contracts longer than 12 months, first-year value is Amount × 12 ÷ term in months.

2.3 On split opportunities, the split rep is credited their split percentage and the opportunity owner is credited the remainder.

2.4 Credit belongs to the rep who owned the account on the close date. Ownership changes take effect on the date shown in the account owner history.

3. Commission Rates

3.1 The base commission rate is the quarterly target incentive divided by the quarterly quota.

3.2 Accelerators apply only to the credit that falls inside each band:

Attainment band	Rate
Up to 100% of quota	1.0 × base rate
Above 100% up to 125%	1.5 × base rate
Above 125%	2.0 × base rate

4. Cap

4.1 Quarterly variable pay is capped at 3 × the quarterly target incentive ($60,000).

5. Clawbacks

5.1 If a customer cancels within 90 days of the close date, the commission originally paid on that opportunity is recovered in the quarter in which the cancellation occurs. Cancellations after 90 days are

not recovered.

6. Draws

6.1 Reps in their first two quarters may receive a recoverable draw, listed in the rep roster.

6.2 If earnings fall below the draw, the rep is paid the draw and the difference carries forward as a shortfall. A shortfall is recovered from later earnings, but while the draw applies the payout never falls below the draw.

7. Calculation Order

Credit, then earnings by band, then the cap, then clawbacks, then the draw.
